

WEDNESDAY

CRAFT

Help your child make an ocean floor with two walls of water to show them how God's people crossed the Red Sea!

SUPPLIES NEEDED

- White paper (or colored if available)
- Crayons or markers
- Scissors
- Tape or Glue

STEPS

1. Get two pieces of white or colored (if available) paper
2. Color one paper blue for the water and one paper brown for the sea floor.
3. Cut the water colored paper in half. Then cut strips along one side of both halves (view the diagram for visual).
4. Roll the paper tightly in opposite directions to make the two sides of the paper curl away from each other.
5. Tape or glue the two walls of water to the brown paper creating two waves that reveal an ocean floor.
6. For more fun, have your child draw fish or sea creatures on the flat part of the blue paper.
